# South Carolina.

What an Official has to Say abou Politics and Such.

New York, August 19.—The Graphic oublishes an interview with D. T. Corpin, Assistant District Attorney of South Carolina, now in this city. He says Governor Chamberlain is bound to give the people an honest administration, even if it entails the sacrifice of all his personal benefits. Certain prominent Republicans, however, are opposing his

reform measures.

The Ku-Klux spirit has entirely died The Ku-Klux spirit has entirely died out. This is due alone to the prompt action of President Grant. Better feeling exists between the races to-day than at any time since the reconstruction. The only draw-back at present is on account of the joalousy of the masses headed by a few prominent Republicans. Much reform has been brought about in official circles. Considerable apathy prevails regarding national politics. The people are generally for President Grant. The majority of the population desire more currency. He does not believe the South will urge any claim for the Vice Presidence.

PRO BONO PUBLICO.

# Richard Grant White on Spelling.

I receive, and for some years have re-ceived, many letters daily written by representatives of all sorts and condi-tions of men; and I can safely say that an error in spelling is the very rarest that I meet with. Indeed, an error of this kind almost never occurs in any manuscript that comes under my observation. Mistakes of all other sorts are plentiful, chiefly those in the construction of sentences; those in the meaning of words are common enough; but the spelling may be said to be always cor-rect. A change in spelling seems to be necessary to give neither writers nor readers a complete and easy command of the English language spoken or writ-

readers a complete and easy command of the English language spoken or written.

This outery against the difficulties of English spelling has been heard for many years in certain quarters; but it does not come from the body of intelligent English-speaking people. Men who devote themselves to one special study are apt to become "hyped" upon it, to find some favorite grievance, and weep, and wail, and wring their hands to be ing officer he was maleted \$10 and costs.
